# ABOUT US

## INTRODUCTION

At **Bajrang International School**, we believe that every child is gifted with unique abilities waiting to be nurtured. Our mission is to create a joyful, safe, and inspiring learning environment where children grow academically, emotionally, and socially. With a balanced blend of modern education and strong traditional values, we shape young learners into confident, responsible, and compassionate individuals

SCHOOL**

# ART PROGRAM

**BAJRANG INTERNATIONAL SCHOOL**

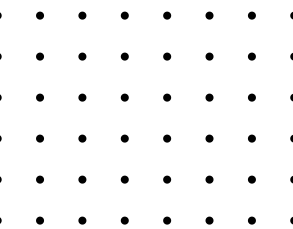

The "**Growing Minds**" Integration

As part of the Growing Minds Program, art is used to help students:

Solve Problems Independently:

Creating art requires planning and execution, which helps students think through challenges.

Cultural Awareness: Art projects are often tied to cultural celebrations and festivals, helping students understand Indian heritage through creative work.

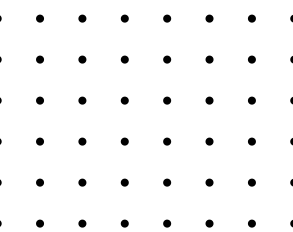

# KNOWLEDGE

## EDUCATION FOR THE BEST FUTURE

To expand on the Knowledge shared in the art program at Bajrang International School, the curriculum is built around the "Growing Minds" framework. This approach moves away from rote imitation and focuses on conceptual understanding and interdisciplinary connections

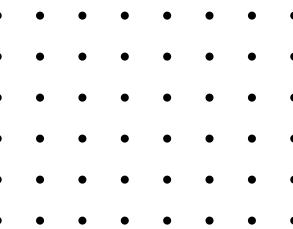

# TEAMWORK

At Bajrang International School, The Collaborative Framework Teamwork in the art room helps students develop soft skills like negotiation, empathy, and collective problem-solving.

# IMAGINATION

## Why Imagination Matters at Bajrang

The school integrates imagination into the curriculum because it directly impacts a student's future success:

**Empathy:** Imagination allows students to imagine themselves in someone else's shoes, which is core to their "Values-Based" education.

**Scientific Inquiry:** Every great scientific discovery started as an imaginative "leap." By fostering this in the art room, the school supports the STEM/Robotics curriculum.

**Confidence:** When a child realizes they can create a world that didn't exist before, it builds an immense sense of personal agency.

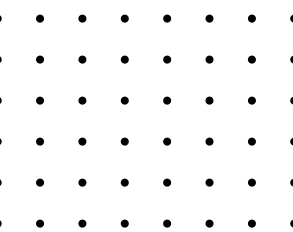

**SMART**

# LANGUAGE

A key part of the Bajrang experience is the Presentation. Students are encouraged to stand before their peers and "defend" or explain their work. This builds public speaking skills and ensures that the "Language" they've learned in the art room translates into real-world confidence.

# CONFIDENCE

## LEARNING IS A JOURNEY

### Mastery of Tools (The "Hitech" Boost)

There is a unique surge in self-esteem when a student masters a complex tool.

- **Tech-Art Integration:** Using the school's AI-powered digital boards or Robotics integration, students realize they can command modern technology to express their inner thoughts. This "digital fluency" makes them feel prepared for a tech-driven future.

**BAJRANG  
INTERNATIONAL  
SCHOOL**

# PROGRAM

**Focus:** Activity-Based Learning & Observation.

**Activities:** Introduction to Color Theory, 2D to 3D transformations, and storytelling through drawing.

**Goal:** Developing the "Language" of art and learning to work in teams on class projects
